★ CORE SKILLS

- IT Support & Troubleshooting
- Network Administration
- Routing & Switching
- System Security
- Windows Server Administration
- Active Directory Management
- PC Assembly & Hardware Diagnostics
- CCTV & Access Control Systems
- Front-End Development

⚙️ TECHNOLOGY

- TCP/IP • IPv4 • LAN/WAN • Subnetting
- VLANs • Trunking • Inter-VLAN Routing
- DHCP • DNS • NAT • Cisco CLI
- Packet Tracer • PuTTY • Wireshark
- Windows Server • AD DS • Group Policy
- NTFS • Shared Folders
- PC Hardware • BIOS • HDD/SSD • RAM
- IP CCTV • NVR/DVR • Remote Viewing
- React.js • JavaScript • HTML5 • CSS3
- Tailwind CSS • Git • GitHub • VS Code

🗣️ LANGUAGES

- Amharic — Native
- English

✓ CERTIFICATIONS

- AI Fundamentals — Udacity
- Programming Fundamentals — Udacity
- IT Infrastructure & Practical Networking Training

✓ REFERENCES

BINIYAM GOSSA KEBEDE

COMPUTER SCIENCE GRADUATE | IT INFRASTRUCTURE | NETWORK ADMINISTRATION

● PROFESSIONAL PROFILE

Computer Science graduate from Hope Enterprise University College with practical experience across IT support, network administration, Windows Server and Active Directory, hardware maintenance, CCTV/access control, and front-end development. Hands-on with Cisco networking, system security, troubleshooting, and technical documentation, with a strong focus on reliable day-to-day IT operations.

▣ PROFESSIONAL EXPERIENCE

IT Infrastructure & Systems Support Trainee | Nifas Silk Technical College

28 Apr 2026 – 27 Aug 2026

- Provisioned, configured, and maintained desktop hardware, operating systems, and network infrastructure to support consistent availability.
- Managed user access permissions, Active Directory accounts, and technical tickets, providing support across hardware, software, and connectivity issues.
- Supported network cabling, VLAN/IP allocation, system backups, and technical documentation/SOP creation for routine IT operations.

◆ EDUCATION

BSc in Computer Science | Hope Enterprise University College

12 Apr 2021 – 22 Feb 2025

Focus: System Security, Network Administration, Software Development & Computer Maintenance

◇ SELECTED PROJECTS

Enterprise Network Infrastructure & Security

Designed and simulated a multi-department topology; configured VLAN segmentation, trunking, inter-VLAN routing, DHCP, and static routing using Cisco Packet Tracer and physical switches.

Windows Server & Active Directory Lab

Deployed Windows Server as a Domain Controller; created OUs, managed users, delegated administration, applied Group Policy, configured mapped drives, and implemented NTFS permissions.

IP CCTV & Biometric Access Control

Installed and calibrated a 4-channel IP CCTV/NVR system with remote mobile viewing and integrated biometric fingerprint access control with electric door locks via relay switching.

PC Assembly & Hardware Maintenance

Assembled desktop workstations, configured BIOS, deployed Windows from USB media, diagnosed hardware faults, and serviced office multifunction printers.
